

Vulture Vomit (Natures Grossest)

Vultures have some pretty disgusting habits. Their idea of a yummy meal is carrion, or rotting meat. But they have an even grosser idea of how to protect themselves from their predators. They throw up on them! Vultures can make their acidic vomit fly several feet to burn their enemy. This also makes them lighter so they can fly away. Readers may think these adaptations are gross, but they'll keep turning the page to find out even more in this entertaining and brightly designed book.
