

# The Future of Tomorrow: How Technology, Medicine, Computers, and Travel Will Change Beyond the 21st Century

\* The thoughts of nanotechnology and its use for military, human health, and food applications, are no longer the futuristic notions of dreamers. Learn how computers no smaller than your own blood cells will be your hope for a new tomorrow. \* Cant have a child or you would like a child free of disease, with a certain color hair and eyes. Or, would you like to choose your childs potential IQ? Read inside to find out more. \* Have you ever dreamed that someday there would truly exist a fountain of youth? Well your wait is over. \* The end of world hunger, the creation of super humans, and the ability to travel from home to any where in the world in 2 seconds on a beam of light, may yet exist within our lifetime. Learn more.. \* Learn how DNA computers will replace todays silicon micro processor in the years to come... \* A cure for Alzheimers, Parkinson disease, Sickle cell anemia, and even Cancer may already exist. Learn more today!!! \* Will computers with the capability of using artificial intelligence take over mankind or will we remain in control? These are but a few of the exciting discoveries that you will find inside this book. Dont wait, take a glimps of the future as it exist today, and journey with me as we go in search of a world beyond the 21st century. As a young child, I would go outside at night and gaze at the stars and wonder. My parents, both having their Masters Degrees and beyond, gave me the latitude to question and to dream. As a teenager, I excelled in my studies and was elected by my town to be an exchange student in Europe. I was flown to Washington D.C, where I was briefed by Senators before my flight. I lived with families in Germany, Austria, & England. I also traveled to Holland, France, Switzerland, Liechtenstein, & Czechoslovakia. As an adult, I have also traveled to Italy, Canada, Mexico, & the Bahamas. Meeting people and making

friends with individuals from various cultures increased my respect for different beliefs and viewpoints.. I am a graduate of Texas Tech University, with a B.B.A. in Business Management. I also have a Masters Degree in Management Information Systems. Outside of the various certifications and positions I have earned throughout my life, I realize that I would have nothing if it were not for the ones that struggled before me. I have over 18 years of management experience in the fields of Information Technology, Insurance, Finance, and Health Care. I currently manage the Mainframe, Midrange, and Systems Support areas of a major Health Care provider. Overall, I am still a small town boy that happens to live in the big city. The encouragement of my wife, my mother, and the love of my daughter, has been an inspiration to me. Because of their love, your journey into the hidden secrets of our future can now begin. So, remember back when you were a child and when you still dared to dream. Take that leap of faith again today and read more of the dreams that await you, beyond the 21st Century.
