

## Fables of the Forest

This book brings together a set of stories that depict some of the most meaningful lessons of modern times with simple and direct messages for children. In order to impart valuable knowledge about common and realistic problems, the author transforms ordinary instances of life in easily understandable situations, as in the case of forest trees. These stories promote conscience, through induction and individual judgment, while promoting reflection and transmitting significant values about morality and ethics. It is, above all, an opportunity offered to younger people to acquire knowledge about problems experienced by adults, in an approach based on conversations that the author developed for many years with hundreds of children with emotional, cognitive and learning difficulties.
