Maggie Silver has never minded her unusual life. Cracking safes for the worlds premier spy organization and traveling the world with her insanely cool parents definitely beat high school and the accompanying cliques, bad lunches, and frustratingly simple locker combinations. (If its three digits, why bother locking it at all?) But when Maggie and her parents are sent to New York City for her first solo assignment, her world is transformed. Suddenly, shes attending a private school with hundreds of mean girl wannabes, trying to avoid the temptation to hack the schools elementary security system, and working to befriend the aggravatingly cute son of a potential national security threat . . . all while trying not to blow her cover. From the hilarious and poignant author of *Audrey, Wait!* comes a fast-paced caper that proves that even the worlds greatest spies dont have a mission plan for love.
