

## The soils and agriculture of the southern states

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: ...from the disintegrated parent rocks are distributed through the soil and subsoil in many instances, and larger fragments of quartz and other rocks are not uncommon. The material comes chiefly from granite and gneiss, but materials from other metamorphic and igneous rocks, such as greenstone, locally have entered into the composition of these soils, as they have been mapped. Bedrock lies generally deeper than 3 feet, but in places on the steeper slopes disintegrated rock is encountered at depths of less than 3 feet. These soils generally contain more organic matter than the Cecil, except on the washed slopes, some areas (the black loam), having as a result a dark color and very mellow desirable structure in the soil. There has been considerable movement of the soil down the slopes, and on bench positions and the smoother slopes much colluvial material has accumulated, giving rise to very desirable loamy soils. The drainage is good and the soils hold adequate supplies of moisture when proper tillage can be performed and bedrock or disintegrated rock is not near the surface. Plowing is impossible on the steepest slopes, and cultivation is likely to be followed with some washing on the average slope unless soil-binding crops are grown. Probably 20 per cent of these soils can be safely used for the intertilled crops. Some farmers use very steep areas by cultivating with hoes. Apples are successfully grown, frequently on slopes where, with the ordinary crops, the soil would wash away. A large part of these lands is timbered with oak, chestnut, maple, buckeye, and tulip-poplar. Rhododendron and mountain laurel are often found in thickets of almost impenetrable density. The principal types

are the loam, sandy loam, clay, clay loam, and stony loam. With the excepti...
